ABOUT PURPLE DOT INTERNATIONAL LTD

Purple Dot International Limited is a fast growing and dynamic residential and commercial real estate development company.

Led by a team of experienced and innovative business partners working towards building investment opportunities for communities across the globe.

With strong ethics and an even stronger passion for stability, growth and building a future where thriving financially goes sustainably hand in hand with people and planet ,
Purple Dot International Ltd is trusted for their proven experience and ethical business approach.

OUR PROMISE

We promise to deliver quality, reliable and timely real estate investment opportunities for our valued investors.

OUR VISION

We aspire to become Africa's leading excellence driven real estate developer with strong focus on trust, reliability and stakeholder relationships.

OUR MISSION

We are driven to build quality, relevant and trustworthy real estate investment opportunities through ethical and fair business practices.

Our business model has a twofold approach: the first is delivering a quality project at the lowest, most competitive price by researching, planning and developing a market-based solution with a team of experienced consultants - architects, engineers, interior and building contractors, as well as administration and management support staff.

The second is affordability - with a clear, transparent and well structured inclusive approach to payment plans for our investors.

For the individual who wants to buy a property for their own use, diversify an investment portfolio, we help realise a vision that may otherwise have been out of reach for most, with little to no experience in making their industrial, residential or commercial investments grow in value in a sustainable way.
